

**Pastili**

Natural & Organic Honey  
from Bulgaria

## Who We Are?

Pastili Limited is a Bulgarian company specialized in manufacturing and trading of organic and natural honey and is one of the biggest honeycomb producers in Europe. Our business model is to operate both the primary production and the processing and packaging. This allows us to strictly monitor and control the whole process and deliver only high quality products.

The whole production process is carried out in our GMP and HACCP certified factory in full compliance with the EU standards. Along with our own production we purchase honey from other Bulgarian beekeepers as treating the whole business operation like product derived from our own apiaries.

## Five things that makes us different

- Best Quality Available
- Primary Producer
- Total Management
- World Recognized Certifications
- Highly Effective Production

### DID YOU KNOW

*Honey bees it is the only insect that produces food eaten by man.*

## Why Bulgarian Honey

Bulgaria is a small country, gathered in a handful of places, but it has so much magic, history, traditions, and natural treasures that no imagination can hold. The biodiversity is extremely rich because it has almost all European habitat types as well as a significant number of unique ecosystems. Over one third of the country's territory is mountainous and semi-mountainous areas, pure nature, far away from industrial areas and all sources of pollution. The lack of working enterprises in heavy industry leads to preservation and enrichment of the ecological environment, which gives the green light to organic production. Bulgaria is one of the richest countries in herbs and honey plants in Europe, many of which are unique to the world.

The power of Bulgarian honey is that it combines several unique honey types of certain valuable and healing meadow plants such as acacia, lime, thyme, lavender, etc., and also that an increasing amount of it is from the desired category "bio". The Bulgarian honey is unique and of high quality, and its taste is different from what you have tried before. This is because it is harvested in small private farms in quiet forest and mountainous areas in the wild, remote from the industrial zones. Bulgarian honey has unique quality due to the fact that it is produced in smaller quantities with the utmost care of the farmers.

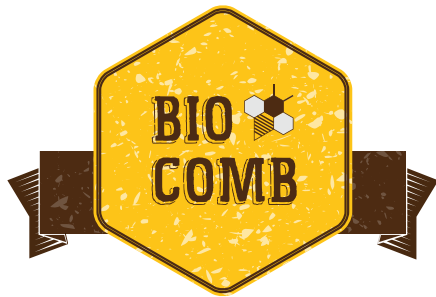

### DID YOU KNOW

*A hive of bees will fly 90,000 miles, the equivalent of three orbits around the earth to collect 1 kg of honey.*

### DID YOU KNOW

*Honey is the only food that includes all the substances necessary to sustain life, including enzymes, vitamins, minerals, and water; and it's the only food that contains "pinocembrin", an antioxidant associated with improved brain functioning.*

## About BioComb

BioComb is harvested from the cleanest mountain regions of Bulgaria, hand cut and boxed with no additional treatment or processing. It is the purest, rawest form of honey available, naturally fat free, cholesterol free, sodium free, and gluten free.

BioComb is natural product straight from the honeybee hive with all of the natural enzymes, amino acids, pollens, vitamins and minerals.

### DID YOU KNOW

*It takes one ounce of honey to fuel a bee's flight around the world  
(National Honey Board).*

## Acacia Honeycomb

Our premium acacia honeycomb comes straight from the hive and is the healthiest and most raw form of honey available. Produced in one of the cleanest mountain regions in Bulgaria and packaged in strictly controlled process this product is a delicacy of nature with a piece of soul from the bees.

Acacia honey is one of the most precious type of honey. With its exceptional healing properties and gorgeous mild flavor it is the perfect family's nutritional and wellness gift.

## About BioHoney

Bio-certification means meeting a set of strict organic norms and uncompromising requirements during the honey production as well as maintaining the highest environmental standard possible. The results produce a superior, energy packed honey with the highest possible levels of the live enzymes, vitamins, minerals, antioxidants and healing agents.

### DID YOU KNOW

*During chillier seasons, worker bees can live for nine months. But in the summer, they rarely last longer than six weeks—they literally work themselves to death.*

## Acacia BioHoney

Acacia honey is considered one of the best types of honey. The natural product is with wonderful medicinal action, antiseptic, antioxidant properties and energizing effect. Acacia honey has a low pollen content that makes it the least allergenic honey, the most suitable for small children. It's slightly floral flavor and mildly sweet doesn't alter the taste of beverages it is added to. If the diabetics have to choose one type of honey instead of sugar, they should opt for acacia honey, because of the lower GI. Acacia honey is very easily absorbed by the body and eating high-quality organic honey regularly is an extremely healthy habit.

Available sizes & Product code:

## Forest BioHoney

Forest honey is acclaimed as one of the most unique and special honeys, produced from nature forest's honeydew. This honey has been found to have an exceptionally high level of antioxidant activity. The color can be a good indicator of the antioxidant power – the darker the honey the higher the antioxidant activity. High concentration of antioxidants in this honey helps in elimination of free radicals, reduces the damage caused by them, and promotes general health. His generous content and lower glycemic index is the best way to enjoy something sweet and healthy, with mild resinous aroma and very special benefits.

### Available sizes & Product code:

2305

## Lavender BioHoney

Lavender honey is a wonderful taste experience with delicate fragrance. It is an unique variety of vitamins, minerals, antioxidants, enzymes and amino acids. This impressive composition makes lavender honey an excellent energizing food with antibacterial action, beneficial on health, great for skin care. Lavender honey contains the primary amino acid of our body – tyrosine. This makes it very useful for treat depression, anxiety and chronic fatigue. Furthermore, this type of honey is a fine delicacy spreadable on toast, biscuits, pancakes, waffles – a pleasure at breakfast to relax you and promote a perfect day.

## Linden BioHoney

Linden honey is one of the most valuable and best varieties of honey. Except the excellent taste and unique flavor, linden honey has many health benefits. The natural sugars in the honey have prebiotic effect, feeding the good bacteria in digestive system. Linden honey is a natural tonic, raising energy levels and improving immune system. The viscous consistency of the honey allows it stick to the throat lining and this ability, along with its antibacterial properties, makes linden honey an excellent remedy for sore throat and cough. The raw organic honey is extremely useful for injuries and eye diseases.

## Polyflora BioHoney

Polyflora honey is the most popular and searched honey, collected by multiple field and mountain flowering species. This type of honey is highly appreciated for its rich flavor profile, nutritional and medicinal qualities as well as higher content of minerals compared to most monofloral honeys. The darker the color of the honey, the more natural pigments it contains which is the cause of a stronger antioxidant action. Rich in different pollen types and varied nutritional profile, polyflora honey contribute a stronger immune system and better health. Each nectar in its composition brings elements with a unique therapeutic action, making polyflora honey delicious and healthier option.

# Blütenpollen

## About Bee Pollen

Pastill's Bee Pollen is 100% pure, natural and premium quality. It has no additives and all of its enzymes are kept intact. Bee pollen is richer in proteins than any animal source. It contains more amino acids than beef, eggs, or cheese of equal weight. About half of its protein is in the form of free amino acids that are ready to be used directly by the body.

## Premium Bulgarian Bee Pollen

Our bee pollen is carefully sourced from one of the cleanest regions in Bulgaria and dried at controlled temperature for better preservation and packed with all of its carbohydrates, vitamins (B complex, Folic Acid & more), proteins, lipids and minerals.

Bee Pollen is considered to be one of nature's most complete foods, containing nearly all nutrients needed for the human body. Many people consider it as the superfood of 21st century – the perfect nutritional supplement for your healthy living.

# Creammy

## About Creammy

Creamed honey is 100% pure honey, whipped to perfection, a fine and silky-smooth natural product with spreadable consistency and delicious taste. It's made from raw honey harvested in our bee-farm, blended with carefully sourced organic cacao, organic cinnamon and organic coconut. The balance of these fantastic ingredients makes our creamed honeys so special.

### DID YOU KNOW

*A colony of bees consists of 20,000-60,000 honeybees and one queen. Worker honey bees are female, live for about 6 weeks and do all the work.*

## Creammy Cinnamon

Creammy Cinnamon contains 2.5% Organic Cinnamon Powder. Cinnamon powder comes from the bark of tropical, evergreen trees. In order to harvest cinnamon, it's peeled off of the inside of the bark of the tree. This bark contains several special compounds which are responsible for its many health promoting properties- including cinnamaldehyde, cinnamic acid, and cinnamate.

According to researchers, out of twenty-six of the most popular herbs and medicinal spices in the world, cinnamon actually ranks #1 in terms of its protective antioxidant levels!

Available sizes & Product code:

350g  
4301

225g  
4302

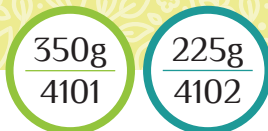

## Creammy Cocoa

Creammy Cocoa contains 7.5% Organic Cocoa Powder. Our cocoa powder is unsweetened and without any substances added. It comes from cocoa beans, which are produced by the cacao tree, which is farmed in many tropical countries. The beans are processed into chocolate liquor, most of the fat is removed, and the remaining paste is dried and powdered.

Cocoa is one of nature's many miracles, is in fact the great super-food that many people seek. There is sweet irony in the fact that cocoa, once considered by some self-appointed health experts to be deleterious to health, has proven over time to be extraordinarily beneficial for health indeed.

Available sizes & Product code:

## Creammy Coconut

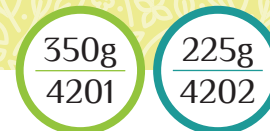

Creammy Coconut contains 10% Organic Coconut Flour. It is simply dried, ground up coconut meat. Coconut flour is gluten-free, low in carbohydrate and high in fiber. It has been used for centuries as both food and medicine and can be classified as a "superfood". Its benefits include weight loss, better brain function. Several substances in the coconut may boost immune function and help your body fight disease.

### DID YOU KNOW

*A honey bee visits 50 to 100 flowers during a collection trip.*

Available sizes & Product code:

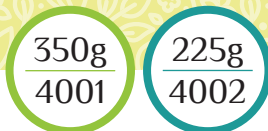

## Creammy Natural

Creammy Natural is made from 100% pure natural honey that has been whipped to perfection. Its texture can be simply compared to a light mousse that is smooth, thick and spreadable.

Creamed honey has the same nutritional value as its liquid counterpart. The biologically active consistency of honey stays the same with the creaming process, as well as, all its compounds, great taste and pleasant aroma. Creamy honey allows you enjoy the benefits of honey straight from the hive, which contains over 140 compounds, including vitamins, minerals, essential oils, proteins and antioxidants.

Available sizes & Product code:

## Products Quality

Bulgarian honey is one of the best quality European honeys. Thanks to the rich plant species and preserved nature, bees collect acacia, linden, forest and herbal honey with unique flavor and great quality.

We take serious care and efforts about our products quality. That's why we select beekeepers that harvest honeys and honeycomb in the cleanest mountain regions of Bulgaria. Then the honey is transported to our dedicated processing facility and packed under strictly controlled environment in compliance with HACCP and GMP best practices.

**Intertek**

**SGS**

## World Recognized Certifications

The certification of our organic range is provided by SGS – the world's leading inspection and certification company. We are certified both as a primary producer and as processing plant under EC Regulations 834/2007 and 889/2008 for organic farming.

Using of EU and USDA organic logos is a guarantee of our premium quality products and working standards.
